

ISO 19650 Building Information Modelling (BIM) Policy Statement

Our Commitment

IG Masonry Support is committed to implementing Business Information Management (BIM) and fully supports collaborative working to achieve practical and efficiently designed, constructed and managed projects.

IG Masonry Support's BIM implementation is tailored to the specific requirements of each contract. This approach considers the integration of existing client systems and compliance with all applicable industry standards to ensure a successful project outcome.

BIM Objectives

Since 2018, Business Information Management (BIM) has been governed by the international standard ISO 19650. IG Masonry Support adheres to its key principles, including:

1. Clearly defining project requirements, standards, and milestones
2. Establishing specific roles and responsibilities for information management
3. Using standardised information structures
4. Implementing effective and secure information exchange methods.

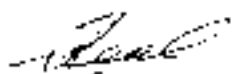

Communication of Policy

This Policy Statement is communicated to all employees and supply chain partners and made available to all interested parties.

Policy Review

This Policy Statement will be reviewed annually to ensure it reflects current legislation and regulations and amended where necessary.
